Goat Anti-Human IgG Antibody (H&L) [HRP], pAb**Cat. No.:** A00166**Size:** 1 mg**Synonyms:** Goat Anti Human IgG (H&L) [HRP]; Anti Human IgG (H&L) [HRP]**Description:**

This polyclonal goat antibody is purified by immunoaffinity chromatography and then conjugated to horseradish peroxidase. It binds to both the heavy and light chains of human IgG.

Immunogen: Full length human IgG (purified)**Host:** Goat**Antigen Synonyms:** Human**Conjugation:** Horseradish Peroxidase (HRP)**Formulation:**

1 mg/ml in PBS, pH 7.4, containing 1% BSA and 0.01% Thimerosal

Ig Subclass: Goat IgG**Purification:** Immunoaffinity chromatography**Applications:**

GenScript Goat Anti-Human IgG (H&L) [HRP] is suitable for immunoblotting (western and dot blots), ELISA, immunoperoxidase electron microscopy, immunohistochemistry, and other peroxidase-antibody based enzymatic assays requiring lot-to-lot consistency.

The investigator must determine the ideal working concentration for each specific application. The ideal working concentration must take into account such factors as secondary antibody affinity, antigen concentration, sensitivity of the detection method, temperature, and the length of the incubations. The suitability of this antibody for applications other than those listed below has not been determined. The following concentration ranges are recommended starting points for this product.

ELISA: 1:10,000-1:100,000.**Western blot:** 1:5,000-1:50,000**Other applications:** user-optimized**Species Reactivity:** Human**Storage:**

The antibody is stable for 2-3 weeks if stored at 2-8°C. For long term storage, aliquot and store at -20°C or below. Avoid repeated freezing and thawing cycles.
