Background

Target Background : The DYKDDDDK peptide is a small epitope tag which is widely used in expression vectors. The tag does not appear to interfere with the bioactivity or bio-distribution of the tagged recombinant proteins. THE™ DYKDDDDK Tag Antibody, mAb, Mouse is a high-affinity monoclonal antibody that can be used to detect DYKDDDDK-tagged proteins

Synonyms : Mouse anti DYKDDDDK-tag mAb; Mouse anti flag-tag mAb
