

THE™ HA Tag Antibody [iFluor 555], mAb, Mouse**Cat. No.:** A01807-100**Size:** 100 µg**Synonyms:** THE™ HA Tag Antibody [iFluor 555], mAb, Mouse; HA Tag Antibody [iFluor 555], mAb, Mouse; 555 conjugated HA antibody; 555 conjugated HA monoclonal antibody**Description:**

The HA tag is a polypeptide with the amino acid sequence YPYDVPDYA that can be added to a target protein using recombinant DNA technology. It can be fused to the N-terminus or C-terminus of the protein to facilitate detection and purification. An anti-HA tag antibody is a useful tool for the analysis of HA-tagged proteins.

THE™ HA Tag Antibody [iFluor 555], mAb, Mouse is THE™ HA Tag Antibody (A01244) conjugated with iFluor 555 under optimal conditions with an F/P ratio of 3-6. It is suitable for detecting the expression level of HA -tagged proteins. iFluor 555 is a bright and photostable fluorescent dye. It is an excellent alternative to Alexa Fluor 555.

Immunogen: A synthetic peptide YPYDVPDYA coupled to KLH**Host:** Mouse**Conjugation:** iFluor 555**Formulation:**

0.5 mg/ml, lyophilized with PBS, pH 7.4, containing 10 mg/ml BSA and 0.02% sodium azide.

Ig Subclass: IgG1, k**Specificity:** THE™ HA Tag Antibody [iFluor 555], mAb, Mouse recognizes N-terminal, internal and C-terminal HA-tagged proteins.**Fluorescent Dye Characterization**

Cat. No.	Conjugate	Ex (nm)	Em (nm)
A01806	iFluor 488	491	514
A01807	iFluor 555	559	569
A01808	iFluor 647	654	674

Purification: Protein A affinity column**Applications:**

Working concentrations for specific applications should be determined by the investigator. The appropriate concentrations may be affected by antigen concentration, the sensitivity of the method of detection, temperature, the length of the incubations, and other factors. The suitability of this antibody for applications other than those listed below has not been determined. The following concentration ranges are recommended starting points for this product.

Immunofluorescent staining: 1-4 µg/ml**Other applications:** user-optimized**Reconstitution:**

Reconstitute the lyophilized product with deionized water (or equivalent) to make antibody concentration of 0.5 mg/ml.

Storage:

The lyophilized product remains stable up to 2 year at -20°C from date of receipt. Upon reconstitution, it can be stored for 2-3 weeks at 2-8°C or for up to 12 months at -20°C or below. Avoid repeated freezing and thawing cycles.
