

S100A2, His, Human

Cat. No.: Z03085-50

Size: 50.0 ug

Synonyms: Protein S100-A2, CAN19, Protein S-100L, S100 calcium-binding protein A2, S100A2, S100L, MGC111539

Description:

S100 calcium-binding protein A2 (S100A2) is a small calcium binding protein with 2 EF-hand structures and belongs to the S100 family. Greater than 25 different S100 proteins have been identified on chromosome 1q21. S100A2 is primarily localised in the nucleus with translocation to the cytoplasm. S100A2 may function in protein phosphorylation, enzyme activation, inflammation, cellular contraction and relaxation, and nuclear transcription promoting cell proliferation and differentiation.

Recombinant S100 calcium-binding protein A2 (S100A2) with His tag produced in *E. coli* is a single chain containing 104 amino acids with molecular mass of 11.9 kDa analyzed by reducing SDS-PAGE and is obtained by chromatographic techniques at GenScript.

Amino Acid Sequence:

```
00001 MHHHHHMC SLEQALAVLV TTFHKYSCQE GDKFKLSKGE  
00041 MKELLHKELP SFVGEKVDEE GLKKLMGSLD ENSDQQVDFQ  
00081 EYAVFLALIT VMCNDFQGC PDRP
```

Source: *E. coli*

Species: Human

Molecular Weight: 11.9 kDa, observed by reducing SDS-PAGE.

Formulation: Lyophilized after extensive dialysis against PBS.

Reconstitution: Reconstituted in ddH₂O at 200 µg/ml.

Purity: > 95% as analyzed by SDS-PAGE.

Endotoxin Level: < 1 EU/µg, determined by LAL method.

Storage: Lyophilized recombinant S100 calcium-binding protein A2 (S100A2) remains stable up to 6 months at -80°C from date of receipt. Upon reconstitution, S100A2 should be stable up to 2 week at 4°C or up to 3 months at -20°C.
