DATASHEET

PACAP (1-38), human, ovine, rat

Cat. No.: RP10335

Overview

Description	PACAP (1-38), a novel neuropeptide isolated from the bovine hypothalamus is more active than vasoactive intestinal peptide (VIP) in stimulating adenylate cyclase (EC50=7 nM). PACAP 1-38 (10 ⁻⁹ M) increased substance P (SP), gastrin releasing peptide (GRP), and VIP release. PACAP 1-38 (10 ⁻⁸ M) inhibited gastrin secretion and stimulated somatostatin secretion and motility dose-dependently.
