

β-Casomorphin, human**Cat. No.:** RP11056-25**Size:** 25 mg**Alias:** βCasomorphin; b-Casomorphin; bCasomorphin; beta-Casomorphin; betaCasomorphin**Description:**

β-Casomorphin is an opioid peptide. It was first isolated from an enzymatic digestion of casein that is an agonist at μ opioid receptors. Casomorphin 1-7 stimulates fat intake in rats. β-Casomorphin is a β-casein related peptide that plays an important role in determination of surface properties of the casein micelles.

Cas No: 102029-74-3**Sequence (one-letter code):**

YPFVEPI

Sequence (three-letter code):

{TYR}{PRO}{PHE}{VAL}{GLU}{PRO}{ILE}

Formula: C₄₄H₆₁N₇O₁₁**Molecular Weight:** 864**Purity:** > 95%**Storage:**

Store β-casomorphin at -20°C. Keep container tightly closed.

Note:

*For Non-Clinical Research Use Only *
