DATASHEET

EGFRvIII peptide (PEPvIII)

Cat. No.: RP20356

Overview

Description	The epidermal growth factor receptor variant III (EGFRvIII) is a consistent tumor-specific mutation that is widely expressed in glioblastoma multiforme (GBM) and other neoplasms. As such it represents a truly tumor-specific target for antitumor immunotherapy.
Sequence	{Leu}{Glu}{Glu}{Lys}{Lys}{Gly}{Asn}{Tyr}{Val}{Val}{Thr}{Asp}{His}{Cys}
Sequence Shortening	LEEKKGNYVTDHC
Molecular Weight	1634.82

Properties

Purity	> 95%
Form	Lyophilized
Storage	Store at -20°C.
