DATASHEET

SARS-CoV-2 Spike Glycoprotein-crude

Cat. No.: RP30020CN

Overview

Description	This pool includes 316 peptides (delivered in two subpools of 158 & 158 peptides) derived from a peptide scan (15mers with 11 aa overlap) through the entire Spike glycoprotein (Protein ID: P0DTC2) of SARS-CoV-2 (Severe Acute Respiratory Syndrome-related coronavirus 2) for T cell assays.

Properties

Purity	Crude
Solubility	Dissolve in a minimum amount of pure DMSO (approx. 40 µl) and dilute with PBS buffer to the final concentration. Please note that the final concentration of DMSO must be below 1 % (v/v) to avoid toxicity in the biological system.
Form	Lyophilized
Storage	Store at -20°C.

Note The peptides of this product are supplied as trifluoroacetate salts

Applications

T-cell assays, Immune monitoring, Antigen specific T-cell stimulation, T-cell expansion, Cellular immune response
