DATASHEET

SARS-CoV-2 Spike protein (RBD, E484Q, L452R, Avi & His Tag)-HRP

Cat. No.: Z03608

Product Introduction

Species	SARS-CoV-2
Protein Construction	<div style="display: flex; align-items: center; gap: 10px;"> <div style="background-color: #0056b3; color: white; padding: 5px; text-align: center;"> Spike RBD [Arg319-Ser591 (E484Q, L452R)] Accession # P0DTC2 </div> <div style="background-color: #90c080; color: white; padding: 5px; text-align: center;">Avi</div> <div style="background-color: #548235; color: white; padding: 5px; text-align: center;">Poly-His</div> </div> <div style="display: flex; justify-content: space-between; margin-top: 5px;"> N-term C-term </div>
Conjugate	HRP
Biological Activity	This protein is validated to bind with human ACE2 (Cat. No. Z03516) in functional ELISA assay.
Expression System	CHO
Application	The optimal dilution ratio should be determined by the end user for specific applications. ELISA 1:1000
Formulation	Supplied as a solution in PBS, pH 7.4, 0.1% ProClin 300.
Storage & Stability	Upon receiving, this product remains stable for up to 3 months at 2-8°C. Protect from light.

Examples

B.1.617 RBD-HRP with ACE-2

SARS-CoV-2 Spike protein (RBD, E484Q, L452R, Avi & His Tag)-HRP can bind with ACE-2 Fc Chimera, Human (Cat. No. Z03516) in a functional ELISA.

Background

Target Background : SARS-CoV-2 (Severe Acute Respiratory Syndrome Coronavirus 2) also known as 2019-nCoV (2019 Novel Coronavirus) is a virus that causes illnesses ranging from the common cold to severe diseases. Lineage B.1.617, also known as G/452.V3, was first identified in October 2020 in India. This variant has the double mutations E484Q and L452R in the spike proteins. Emerging research suggests the variant may be more transmissible than previously evolved ones. Whether the effectiveness of currently-deployed vaccines is affected remains under investigation. Moreover, the sublineage B.1.617.2 has been redesignated as "variant of concern" (VOC-21APR-02) in May 2021, which spreads more quickly than the original version of the virus.

Synonyms : Lineage B.1.617; "double mutation" variant; India variant
